

A modular reboundable chevron system with proven durability

Features & Benefits

- Reboundable Design
Has proven field impact resistance, returns to upright position and continues to function following impact
- Modular Design
Configurable to all site requirements
- Tough UV stabilised polymer blade return unit
Remains operational over a wide range of temperatures, including sub-zero
- The blade return units are individually mounted on the foundation
Blades can be easily replaced if needed
- Choice of surface or trough mounted bases
Suitable for a great variety of applications
- Individual blades are linked together by clips which un-clip on impact
Technology to support longevity and protect your investment
- Available with or without borders
Bespoke applications available on request
- Blades have undergone specialised treatment to ensure superb adhesion of reflective graphics
Reflective graphics meeting requirements of BS 8408:2005
