

For over two decades the Pulsa School Crossing Signal has been reliably aiding children to cross roads, highly visible to drivers both from a distance and close to. The range constantly evolves, with the latest utilising GPRS technology enabling the unit to be programmed and interrogated remotely via a dedicated web site.

Features & Benefits

- Different angles of LEDs in the clusters Unit is highly visible to drivers at a distance and continues to be so as they draw near
• Pre-wired sign board with four high intensity LED flashing arrays Ideal for Safe Routes to School applications
• Available in different sizes Bespoke for a wide range of applications
• Auto dimming LEDs Prevents glare at night and in the depths of winter
• IP56 rated Minimal maintenance giving low cost of ownership
• Long life LEDs Low running costs
• Die cast aluminium lens cowls Cowls are shatter and corrosion resistant even during extreme weather and offer protection from heavy snow fall.
• Tamper proof access Proven history of outstanding vandal resistance
• Choice of operating systems: 2 year programmable calendar, SMART Pulsa via a handset, GPRS via the internet and text message Cost effective as minimal site visits are required to monitor multiple sites
• GPRS Pulsa option Programmed to report back status updates/ operational functionality at regular set intervals
