

Flexible Lane Divider

Description:

LANE-FLEX lane dividers are the first word in quality, durability and performance, having impressed the examiners at the Texas Transport Institute by surviving over 50 impacts by a car travelling at 65 mph.

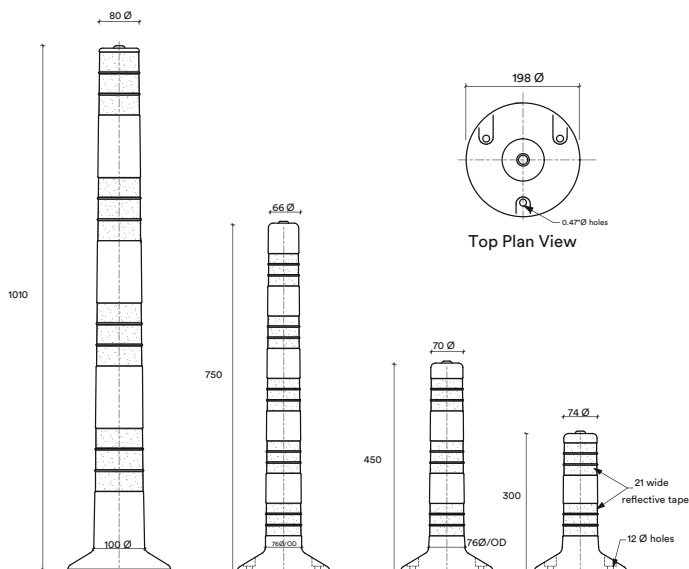

Available in 300mm, 450mm, 750mm and a new 1000mm high, there is a model to suit most applications.

The LANE-FLEX is the product of a design evolution that has put it well ahead of it's nearest competitor. Material selection and design features enable the LANE-FLEX to endure the harshest conditions and punishment.

With replacement and maintenance representing the ongoing expense of most devices of this kind, LANE-FLEX significantly reduces those costs with whole life savings through extended performance and reliability.

Benefits:

- Tough and durable
- Whole life cost savings
- One piece moulded polyurethane construction
- High performance reflectors
- Bolt down, glue down or removable socket fixing

CE Cylinder Body:
BS EN 13422
TUV 28239376 001

PER

Retroreflective surfaces : EN 13422
ASTM D4956-16b, Calcoast 160811-08A
BSI 247/7283636, R2B
