## simmonsigns

## DESCRIPTION

The first truly $360^{\circ}$ aspect Belisha beacon with high intensity LED arrays giving better visibility on sunny days to approaching vehicles and pedestrians.

Based on the highly successful Modubel and Midubel, this new offering raises safety to an even higher level by improving visibility.

Both beacons are a tough, high visibility retro-fit for Belisha beacon assembly for standard tubular beacon posts. It is also possible to retrofit to existing Simmonsigns amber beacon installations with ease.

All beacons have high quality LED lighting units driven at 24 Volts $A C$ for significantly reduced maintenance and improved safety.

## Modustar \& Midustar

Data Guide

|  | ASSEMBLY |
| :--- | :--- |
| Gallery | Die Cast LM6-M aluminium, acid cleaned, chromate primed and polyester powder coated black, <br> incorporating stainless steel globe support mast and pre-fitted stainless steel shroud fixing points. <br> Pre-wired with 4 metres of cable and IP56 transformer connector. All threads are stainless steel <br> bushed. |
| Globe | 335 mm diameter, self-coloured, rotationally moulded, UV stabilised low density <br> polyethylene, 2.5mm nominal wall thickness. Stainless steel Tri-head fixing with load washer |
| Transformer | 230 Volt AC primary, 24 Volt AC secondary @ 2 amps. Fully potted with a vacuum impregnated <br> core, featuring short circuit and thermal protection. Supplied complete with pre-wired IP56 <br> connector for connection to supplied drop lead and fixing screws. Dimensions 90x60x70mm high. |
| Shroud | $3 m m$ black polycarbonate with stainless steel fixings. |
| IP Integrity | IP56 |

The mean luminance from the beacon globe measured in accordance with BS8442

## LIGHT OUTPUT

## ModuStar

High Output $725 \mathrm{~cd} / \mathrm{m}^{2}$ with a uniformity ratio of 0.78 Low Output $400 \mathrm{~cd} / \mathrm{m}^{2}$ with a uniformity ratio of 0.78

* Factory setting
** Night time dimming is activated by a 70 lux photocell with a 2 minute switching delay to avoid erroneous switching.

Night dimming applies to the beacon and high intensity LEDs.

## MiduStar

High Output $1800 \mathrm{~cd} / \mathrm{m}^{2}$ with a uniformity ratio of 0.8 Low Output $1020 \mathrm{~cd} / \mathrm{m}^{2}$ with a uniformity ratio of 0.8

* Factory setting
** Night time dimming is activated by a 70 lux photocell with a 2 minute switching delay to avoid erroneous switching. The MiduStar has independent beacons halves, each with its own photocell. Each half could therefore dim at slightly different times.

Night dimming applies to the beacon and high intensity LEDs.

## LIGHT OUTPUT IMPACT OF HIGH INTENSITY LEDs

|  | DAY (Circuit Watts) |  |  |  |  | NIGHT** (Dimmed Circuit Watts) |  |  |  |
